Plain Healthcare appoint Advanced Health & Care as reseller of Odyssey CareAssess

Plain Healthcare is pleased to announce the signing of a reseller contract with the Advanced Health & Care division ("AH&C") of Advanced Computer Software Group plc ("ACS"), for the sale of its Odyssey CareAssess product in the UK care home market.

Odyssey CareAssess has been designed specifically to meet the needs of nursing and residential care homes and draws on the Company's years of experience within the healthcare industry. It enables both clinically and non-clinically trained staff to offer care home residents high levels of care and support in the event of illness or injury.

AH&C is a leading supplier of health and care software solutions and is the largest supplier of IT software and services to the UK care home sector. The contract gives AH&C exclusive reseller rights for Odyssey CareAssess in the 20,000 plus UK care home market for an initial period of one year.

Tim Morris, Managing Director of Plain, commented:

"We have worked in partnership with Adastra, now part of AH&C, for many years and are pleased to have the AH&C team promoting our new Odyssey CareAssess product in the UK care home market alongside CareSys and Saturn. We are confident their knowledge and experience in the sector will accelerate sales of Odyssey CareAssess in the UK."

Jim Chase, Managing Director of Advanced Health & Care, commented

"This is an exciting opportunity for Advanced Health & Care and supports our strategy of transforming community care through the deployment of portable and mobile technology for carers. Odyssey CareAssess provides an innovative and cost effective clinical support tool for care homes that will revolutionise the way they manage their resident's healthcare needs in the future."

Notes to editors

Plain Healthcare produces a range of clinical decision support products under the Odyssey brand, the Odyssey range is built on a common medical content database which has been developed over the past 15 years. Odyssey is continually updated, tailored with question and answer sets and a user interface adapted for the particular user groups and the environment in which it is used. The range includes:

- **Odyssey CareAssess** to support decisions made by care assistants or clinicians in the Care Home environment
- **Odyssey FaceToFace** for face to face assessments in nurse-led clinics, walk-in centres, GP-led health centres and other services
- **Odyssey FirstAssess** is specifically for use in Prisons/Jails and secure environments
- **Odyssey MarineAssess** for use on cargo vessels travelling the globe for use by the ship's captain or master in the event of illness or injury
- **Odyssey ParaMedic** to empower paramedics to make safe assessments in emergency situations
- **Odyssey PatientAssess** is specifically for use within doctor's surgeries to reduce demand for same day appointments
- **Odyssey Reception** is utilised by non-clinical staff to prioritise patient queues and identify potential emergencies quickly and safely
- **Odyssey RemoteAssess** designed specifically for remote locations, ensuring the best possible care and advice for people worldwide who lack access to a fully trained doctor or nurse
- **Odyssey SelfAssess** is to allow patients to self-assess their symptoms prior to consultation with clinical services
- **Odyssey TeleAssess** supports telephone triage by nurses in call centre operations, out of hours services, ambulance trusts, the MoD and other services
